SKIN

The foundation of a barely-there makeup look is great skin. Don't let blemishes, dryness or an uneven skin tone steal your shine. Focus on clarity, brightness and texture. When picking a warm-weather moisturizer, celebrity makeup artist Joanna Simkin, who created these looks, suggests the following: "Instead of cream, try a face oil. Press it into the skin to bring out a flattering, nongreasy glow."

After a day in the sun, cool down with a spray serum infused with a serious dose of hyaluronic acid to rehydrate parched surfaces. **Skin Inc. Pure Serum Mist** (\$55, [Sephora](http://Sephora)).

Clear up dark spots, get rid of roughness and boost moisture levels with a light gel cream that does it all. **Sunday Riley Tidal Brightening Enzyme Water Cream** (\$65, [sephora.com](http://sephora.com)).

To perfect and brighten skin without weighty coverage, “thin out your foundation with an illuminator,” says Simkin. **Chosungah 22** 24H Raybeam Cream in Shimmer Bronze (\$28, sephora.com).

Strobing is just right for the season. Use a bronze shimmer stick to contour and a pearlescent one to highlight. **Wander Beauty** Catch The Light Highlighter in Moon, Sun and Star (\$25 each, wanderbeauty.com).

Instead of a pressed powder formulation, try a sheer loose powder blush or cheek stain. **Stila** Aqua Glow Watercolor Blush (\$26, stilacosmetics.com).

Swap out heavy lipstick formulas for hydrating, glossy stains. **Smith & Cult** The Tainted Lip Stained in Plastic+Pink (\$24, smithandcult.com).

MAKEUP

Simkin's don'ts for your summer routine? “No heavy powder on the skin. It's better to have a youthful glow than to look cakey, like you're wearing makeup,” she says. Keep color concentrated to a single focal point like a wash of aqua blue just below the waterline. Here Simkin used a liquid liner, which she applied with a skinny pointed brush. She winged the line out slightly for a reverse cat-eye effect.

This creamy, vivid matte blue glides on smoothly and then stays put. **Make Up For Ever** Aqua XL Eye Pencil in M-30 (\$21, makeupforever.com).

Dewy skin is the goal, but too much shine can ruin a flawless appearance. Tone down excess glow with an oil-absorbing powder. **blackUp** Cosmetics Anti-Shine Loose Powder (\$32, sephora.com).

Ditch the full-coverage foundation for a moisturizing tinted cream with SPF. **Urban Decay** Naked Skin One & Done Hybrid Complexion Perfector (\$34, urbandecay.com).
